- ❖ Normally the bellows & springs will be broken due to heavy compression or fatigue during running
- ❖ We can easily replace bellows and springs alone. No need to change top and bottom collars.
- ❖ We have developed Bellows and spring suitable for Smartflex coupling 25H7/25H7 for compact spinning
- ❖ Bellows and springs offered by us are being manufactured using special alloy steel and heat treated at par with original to ensure uniform and high hardness value

Intermediate Gear

- ❖ We are a company specializing in high precision and long life parts for textile industry.
- ❖ German made polymers are using for our intermediate gears and therefore we provide you with the unexceptionally level of quality.
- ❖ We can offer very attractive prices and short delivery time.
- ❖ Our broad experience in textile processes guarantees you permanent high quality and efficiency in your production
